THE H. & O. QUALITY

DARWIN TULIPS

BULBS

TREES, SHRUBS AND PLANTS FOR FALL PLANTING

HOLM & OLSON, INC.
ST. PAUL  MINN.

ANNUAL FALL CATALOGUE OF BULBS, HARDY PERENNIALS, SHRUBS AND TREES

INTRODUCTION—In sending you this catalogue, we are pleased to state that you will find a considerable reduction in prices on practically every item, despite the greatly increased demand and the unfavorable growing season experienced everywhere.

Our stock is larger and more complete than ever. We are securing our Dutch Bulbs by direct importation from the foremost grower in Holland and our customers are absolutely assured of getting the very BEST bulbs produced.

These bulbs are of the same grade that we grow for our large and discriminating cut flower trade.

Our motto is always "Quality with Service."

PLANTING AND CARE OF BULBS

Time to Plant. The bulbs of Hyacinths, Tulips, Narcissi and Crocus must be planted in the fall—any time during October or early November as late as the ground remains open. Orders will be filled as soon as the bulbs reach us from Holland and should be planted as soon as you receive them. Special planting directions are given on the page devoted to each particular variety.

The Soil. Any good garden soil will be satisfactory providing it is well drained. A handful of clean sand placed directly beneath each bulb will insure drainage if the soil is heavy or wet. Extra fine flowers are encouraged by adding a little bone meal to the soil while planting.

After freezing weather has set in, cover the bulb plantings with straw or leaves several inches deep.

FALL PLANTING OF PERENNIALS

Perennial Plants store up food during the summer growing months in preparation for a strong, quick start in the spring. In the fall as the leaves die down, the plant becomes mature and enters its resting period, several weeks before freezing weather. This, then, is the ideal period for transplanting—the soil is in good workable condition and the plant has completed its season's growth. We advise September planting for the hardier of the perennial varieties such as are listed herein.

Winter Mulching. After hard freezing (not before) mulch the perennial bed with leaves, straw or old manure, three to four inches deep. Remove this when the frost leaves the ground next spring.

TREES AND SHRUBS AND LANDSCAPE SERVICE

The usual period for fall planting of trees and shrubs is from October 5th on until freezing weather. This fall planting permits the stock to become established so as to take immediate advantage of the spring growing season. For this catalogue we have carefully selected only such varieties as are adapted to fall planting.

Northern-grown and acclimated nursery stock is of prime importance to planters in this section. Our nurseries are located in St. Paul and your personal inspection and selection of plants is solicited. You are assured of the best quality of stock that can be produced and all **freshly dug** from the fields as we do not use a storage cellar.

Landscape Service—complete from plans to planting—is offered to our patrons. Your problems of yard arrangement, selection and grouping of plants, and in fact, all matters pertaining to landscape improvements of any nature, will be given personal attention by men experienced in such work. Full information concerning this **Service** sent on request.

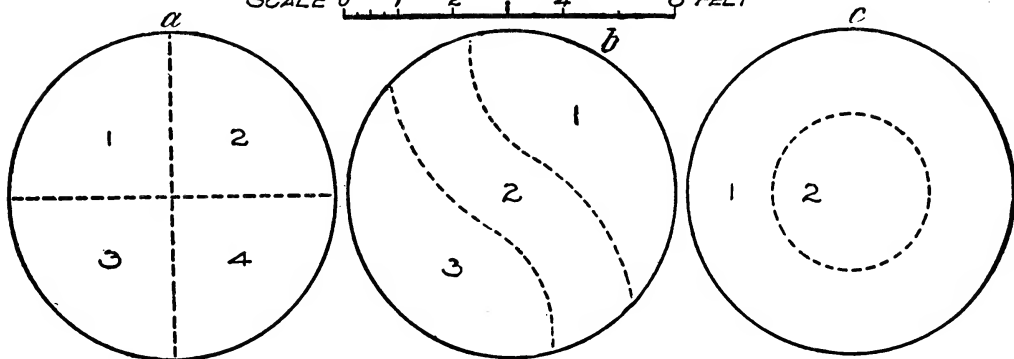

"Creating your Landscape," our large illustrated catalogue, will be sent to all interested.

SPECIAL COLLECTIONS FOR TULIP-BEDS

The arrangement of the following beds will give very striking results. The beds are 6 feet in diameter and require 156 bulbs, planted 5 inches apart each way. These combinations can be changed, if desired.

Bed A 1. 39 Artus 2. 39 La Reine 3. 39 Chrysolora 4. 39 Cottage Maid	\$8.00 or \$8.25 Parcel Post prepaid	Bed B 1. 54 Chrysolora 2. 48 Artus 3. 54 La Reine	\$7.75 or \$8.00 Parcel Post prepaid	Bed C 1. 80 Chrysolora 2. 76 Artus	\$7.75 or \$8.00 Parcel Post prepaid

SCALE 0 1 2 3 4 5 6 FEET

HYACINTHS

Cultural Directions

Culture Outdoors. Plant the bulbs 6 inches deep, very uniformly, that they may come into bloom at the same time. A good method is to remove about 4 inches of the soil, level the bed carefully and plant the bulbs 6 inches apart each way, pressing the earth firmly and evenly over the bulbs.

Culture in Glasses. Special glasses are manufactured for the culture of Hyacinths, the bulb fitting in the top. These glasses should be filled with fresh water, also some gravel, and if at hand, some charcoal.

Culture in Pots. Hyacinths are most successfully grown by planting in pots. Use good, rich soil. Place some pieces of porous material such as broken flower pots in the bottom for drainage, firm the bulb well in the soil, allowing the top of it to just show. Use 4 or 5-inch pots for the large bulbs. After potting they should be watered so as to thoroughly moisten all the soil and should then be placed in a cool, dark place (a vegetable cellar is the best place) for a period of six to eight weeks in order to develop the roots, when they should be brought into the light and into a moderate temperature.

Red, Rose and Pink Shades—

Cardinal Wiseman. Fine deep rose.
General De Wet. Rose; very large truss.
Gertrude. Rose pink.
Gigantea. Light daybreak pink.
Lady Derby. Soft rose pink.
La Victoire. Brilliant rosy red.
Marconi. New, beautiful deep pink.
Queen of the Pinks. Delicate pink.
Roi des Belges. Bright Scarlet.

White—

Christmas White. Early.
Grande Blanche. Pure white.
La Grandesse. Tall fine spike.
L'Innocense. Tall fine spike.
White Lady. Pure white.

Price. We offer these in three sizes—

Extra large size, in all the above named varieties, 20 cts. each; \$2.00 per doz. **Add 25 cts. per doz. for postage, if to be sent by mail.**

First Size, in all the above named varieties, 15 cts. each; \$1.75 per doz. **Add 20 cts. per doz. for postage, if to be sent by mail**

Second Size, in all the above named varieties, 10 cts. each; \$1.00 per doz. **Add 15 cts. per doz. for postage, if to be sent by mail.**

MIXED DUTCH HYACINTHS

First Size, \$1.50 per doz. **Add 20 cts. for postage, if to be sent by mail.**

Second Size, 75 cts. per doz. **Add 15 cts. for postage, if to be sent by mail.**

Bedding Size, 60 cts. per doz. **Add 10 cts. for postage, if to be sent by mail.**

DOUBLE DUTCH HYACINTHS,—Extra Size

Koh-i-Noor. Light pink.
President Roosevelt. Deep rose pink.

La Tour d'Auvergne. Pure white.
Bloksburg. Porcelain blue.

Twenty cts. each; \$2.00 per doz. **Add 25 cts. per doz for postage, if to be sent by mail.**

SELECTED SINGLE EARLY TULIPS

Culture Outdoors. Any good garden soil, prepared by spading to a depth of 12 inches, is suitable. Plant the bulbs 5 inches apart and about 4 inches deep. The soil must be equally placed over the bulbs, so they will come up at the same time. Firm the earth well about the bulbs and mulch the beds during the winter.

Culture in Pots. Place six to eight bulbs in a 6-inch pot; set in a cool, dark place for a period of six to eight weeks. If you have a number of pots, take them from the dark room at intervals, so they bloom at different times.

NOTE. The length of the flower-stem is indicated by figures; the time of blooming by letters (E. early; L. late), so that you can select varieties of the same height and time of blooming.

DOUBLE TULIPS

The Double Tulips are used for both bedding and forcing. Their large peony-like blossoms are highly ornamental, coming into bloom a little later than the single sorts and lasting considerably longer in flower. They make their best display when planted in groups and beds.

BREEDER OR COTTAGE TULIPS

Breeders are the unbroken forms of the old Cottage Tulips. Most of the varieties are purple, maroon or terra-cotta in colors. They are of enormous size and vigorous growth. Very valuable for garden planting. **Extra Fine Mixed**.....75 cts. per doz.; \$6.00 per 100

Add 5 cts. per doz. for postage on Tulips if to be sent by mail.

DARWIN TULIPS

Now that the merits of these wonderful Tulips have become better known, and with greatly reduced prices from former years, they have become very popular. They are a distinct type of late blooming single Tulip, with immense bowl-shaped flowers of well-rounded form, growing on tall, thick stems, 2 to 3 feet in height.

The great variety of brilliant colors ranging from almost pure white through all the shades of pink and red to a most intense violet, together with the long stems, make them unsurpassed for cut flowers.

Darwins are admirably suited for planting in borders of shrubs and perennials, coming into bloom just following the early Tulips and before the early flowering shrubs. We offer this year a complete list of the choicest varieties in their respective color and shade.

CROCUS

We offer only a short list of these bulbs, but they are the very best in their respective color. They have been especially selected for their size and hardness. Crocus may be planted anywhere in the lawn at a depth of 2 to 3 inches. They are the earliest flowers to bloom and a few dotted over the lawn is a most pleasing sight soon after the snow has disappeared.

Sir Walter Scott. Striped blue and white.....	.40	3.00			

The price per doz. includes postage.

FREESIA PURITY

These dainty, spicy, sweet scented blossoms can easily be had in bloom at Christmas if planted early. They are only suited for pot culture as they are not hardy. Plant a number of bulbs to the pot and keep in a cool place such as a vegetable cellar until the roots show through the soil when tipped out of pot. After bringing into light, they should be kept in as low a temperature as possible to get the best results. Giant Bulbs, 60c per doz., \$4.00 per 100. Large bulbs, 40c per doz., \$3.00 per 100

NARCISSI, DAFFODILS AND JONQUILS

The Narcissi are among spring's earliest flowers, and there is no reason why we should not partake of the pleasures they bring with the first warm days of spring. The Narcissi grow in almost any location, doing well in sunny or shady places, and it matters not if wet or dry. They continue to bloom year after year, increasing in size and effectiveness. They are valuable to place in the border of perennials of shrubbery, where they can be left undisturbed, and for naturalizing in the grass. For forcing, treat the same as tulips, planting them in pots. The flowers assume many forms, and present charming combinations of white, gold, orange, sulphur and pure yellow.

Price includes packing on dozen and 100 lots.
Postage or express extra

Bulb Fiber

The growing of bulbs indoors is a source of great pleasure during the winter months. To see the first green sprouts appear and develop from day to day and eventually the buds and flowers, is most interesting and educational to the younger folks. **Bulb Fiber** will be found a great aid and a simple way to grow bulbs. It is scientifically prepared, containing several ingredients in the proper proportions best suited to bulb culture. It is clean and odorless and yet contains plant food such as bulbs need. Should be kept moist and treated like soil. Quart, 20 cts.; half peck, 70 cts.; peck, \$1.25. Mail or express extra.

CHINESE SACRED LILY

Chinese Sacred Lily

These are the most easy bulbs to grow indoors. They may be planted in soil, but are preferably grown in bowls of water with pebbles to hold them upright. Each bulb sends up from four to ten stems producing great clusters of large, white wax-like blossoms, with yellow centers and very fragrant. Some blooms are single, others double, but all equally beautiful.

Mammoth sized bulbs.....25 cts. each; \$2.50 per doz.
Add 20 cts. for postage, if to be sent by mail.

SPECIAL OFFERING OF BULB BOWLS

We have secured a very attractive line of bulb bowls which we offer at about half of former prices. We can furnish these in colors of dull mat green, green and dark blue glazed. They are also desirable as low flower bowls.

5-inch, 50 cts. each

6-inch, 65 cts. each

8-inch, 90 cts. each

State color desired when ordering.

If to be sent by Parcel Post add 10 cts., 15 cts., and 20 cts. respectively.

*Trees should be planted to frame in the house and to shade and cool the grounds around it.
Estate of Dr. A. J. Gillette, Dellwood*

ORNAMENTAL TREES

The trees listed herewith were selected from the large list we grow as the hardiest and sturdiest sorts, and are recommended as suited to fall planting. The roots will establish themselves before freezing weather sets in and the next season's growth be increased through this early establishment.

Only the general average sizes are listed here, but we have a large supply of **heavy specimen trees** for immediate effects, and will quote prices on request. In every instance our best grade transplanted stock is specified. Five or more sold at ten lot rate.

Our complete catalogue "**Creating your Landscape**" sent on request.

DECIDUOUS SHRUBS

For Fall Planting

When the hardier shrub varieties are used there is a real advantage gained by fall planting. The following sorts, carefully selected from our large general stock, are all safely moved during the fall season. Our best grade **transplanted stock** is specified in every instance. Five or more sold at ten-lot rate.

Specimen Shrubs of heavier growth and mature development can be furnished in most every variety. These give immediate Landscape effects. Prices for these large sizes range from \$1.50 to \$5.00 each.

Our complete catalogue "**Creating your Landscape**," sent on request.

Barberry, Thunberg's—

(Japanese Barberry.)	Each	Ten

HARDY PERENNIALS

Delphinium Belladonna Larkspur

Those perennials which are of a strong sturdy type can be advantageously planted in the fall—the month of September being the best period for this work. After the ground has frozen it is advisable to cover the new plantings with a light mulch of leaves or straw to act as a winter protection.

Prices: 1-yr., 30 cts. each; \$3.00 per doz.; strong 2-yr. plants, 40 cts. each; \$4 per doz., except where otherwise noted. Plants priced at 35 cts. each, are \$3.50 per doz.; 40 cts. each, \$4.00 per doz.; 50 cts. each, \$5.00 per doz.

Note. Our perennial stock is of the best quality—grown here at our own northern nurseries. We agree to pack orders carefully and deliver them in good condition to the transportation company. Because of the perishable nature of such goods we can not assume any responsibility as to its condition when reaching destination or guarantee its future growth. All orders are accepted on these conditions.

Our large descriptive catalogue “Creating your Landscape” sent on request.

Achillea, Boule de Neige (White). Ball of Snow.
Achillea, Ptarmica (The Pearl).
Aconitum Fischeri (Monkshood). Blue, 40 cts.; strong, 50 cts.
Anthemis Tinctoria Kelwayi (Hardy Marguerite).
Aquilegia Canadensis (Columbine).
Aquilegia Chrysantha (Golden Spurred Columbine).
Aquilegia Caerulea (Rocky Mountain Columbine). Blue.
Aquilegia Californica Hybrida (Long spurred variety).
Arabis Alpina (Rock Cress). White.
Armeria Lauchearia Rosea. (Sea Pink).
Astilbe, gruno Hybrid (Salmon Pink). 50 cts.; strong 2-yr. plants, 75 cts.
Astilbe, Moerheimii. (White). 50 cts.; strong 2-yr. plants, 75 cts.
Astilbe, Salland Hybrid. (Red.) 50 cts.; strong 2-yr. plants, 75 cts.
Bleeding Heart. See Dielytra.
Bocconia cordata (Plume Poppy). White.
Boltonia asteroides (False Chamomile). White.
Boltonia latisquama (Pink Boltonia).

Pyrethrum uliginosum (Great Ox-eye Daisy).
Ranunculus repens (Buttercup).
Rudbeckia laciniata (Golden Glow).
Sedum spectabile (Brilliant Stonecrop).
Sedum acre (Golden Mass).
Statice latifolia. Sea Lavender.
Spiraea Filipendula Fl. Pl. (Double flowered Meadow Sweet). 50 cts.; strong 2-yr. plants, 75 cts.
Spiraea palmata (Crimson Meadow Sweet). 50 cts.; strong 2-yr. plants, 75 cts.
Valeriana officinalis (Hardy Garden Heliotrope).
Veronica longifolia (Deep blue).
Veronica spicata (Speedwell).
Veronica Virginica (White).
Yucca filamentosa (Adam's Needle). 50 cts.; strong 2-yr. plants, 75 cts.

The Peony rivals the rose in color, and continues in bloom for a month or more.

PEONIES

Peonies are adapted to almost any garden soil. The modern varieties are descendants from *Peonia Albiflora*, a native of Siberia; this probably explains why they are so hardy throughout the entire Northwest, where they endure the most intense cold with almost no injury. In addition to this most requisite quality of hardiness the Peony produces flowers that rival the Rose in brilliant colorings, fragrance and perfection of bloom.

In planting set the "eyes" 2 to 3 inches below the ground surface, and firm the soil tightly over the roots. If planted in large groups they present a mass of color that is striking in its brilliancy, as single specimens or as divisions between different parts of the garden they are equally valuable. The new and improved varieties that we offer are rich in delicate and beautiful shades of red, pink and white.

Our large descriptive catalogue, "**Creating your Landscape**," sent on request.

WHITE

	Roots Each	Clumps Each
Alba Sulphurea. Creamy white.....	\$0.75	\$1.50 to \$3.00
Couronne d'Or. Large blooms of ivory white with yellow circle. Late.....	.75	1.50 to 3.00
Duchess de Nemours. Clear white, extra large bloom; very fragrant. Early.....	.75	1.50 to 3.00
Festiva alba. Midseason.....	.60	1.00 to 2.00
Festiva maxima. Pure white with flake of red in center. Immense bloom. Early.....	.75	1.50 to 3.00
Golden Harvest. Free bloomer	.75	1.50 to 3.00
Jeanne d'Arc. Soft pink tinge	.75	1.50 to 3.00
La Tulipe. Tall. Late.....	.75	1.50 to 3.00
Madame Calot. Rose type. Tinted flesh color; pleasing fragrance.....	.75	2.00 to 3.00
Madame Crousse. Snow white center petals carmine edged.....	.75	1.50 to 2.50
Madame de Verneville. Delicate fragrance. Early and free bloomer.....	1.00	2.00 to 3.00
Marie Lemoine. Late white.....	.75	1.50 to 2.50
Queen Victoria. Good cut flower; medium height; mid-season.....	.50	1.50 to 2.00

PINK

Alexandre Dumas. Early.....	.75	1.50 to 2.50
Albert Crousse. Resembles a large flesh-pink Carnation. Late.....	1.50	3.50 to 5.00
Baroness Schroeder. English	2.00	
Delicatissima. Clear pink; fragrant; early, free bloomer.....	.75	1.50 to 3.00
Edulis Superba. Very early.....	.50	1.50 to 2.50
Floral Treasure. Mid-season.....	.75	1.50 to 2.00

	Roots Each	Clumps Each
Lady Leonora Bramwell. Large rose colored. Fine for cutting.....	\$.75	\$1.50 to \$2.50
Livingstone. Pale lilac-rose. Late bloom; tall; extra fine.....	1.00	2.50 to 3.50
Madame Boulanger. Late.....	1.50	
Madame Camille Bancel. Late.....	1.00	2.50 to 4.00
Marguerite Gerard. Late.....	1.00	2.50 to 3.00
Mons. Jules Elie. Lilac-rose. Extra strong grower; fragrant; early.....	1.00	2.50 to 3.00
Therese. Unexcelled pink.....	6.00	

RED

Auguste Villaume75	2.00 to 3.00
Delachei. Crimson-maroon. Strong and erect. Striking flower.....	.75	1.50 to 3.00
Edouard Andre. Mid season.....	.75	2.00 to 3.00
Felix Crousse. Brilliant red; large flowers; medium height.....	.75	2.00 to 3.00
Karl Rosenfield. New; strong; tall; finest dark red.....	3.00	
Lee's Grandiflora rubra (Late).....	.75	1.50 to 2.00
Louis Van Houtte (Late).....	.75	1.50 to 2.00
Madame Bucquet. Dark maroon; large bloom; mid-season.....	.75	1.50 to 2.00
Mikado (Japanese). Single—like a giant red poppy.....	2.00	3.00 to 4.00
Officinalis rubra. Brilliant red; very early.....	.50	1.50 to 2.50
Richardson's rubra superba. Latest red of all.....	.75	2.00 to 3.00
Tenuifolia (Divided leaf).....	.75	1.50 to 2.00
Tenuifolia flore plena. Fine feathery foliage; crimson.....	1.00	2.50 to 3.00
Japan Tree Peony (Rare).....	2.50	4.00 to 5.00

The great trusses of the Phlox bend and sway in summer breezes

HARDY PHLOX

Herbaceous phlox is the most brilliant and showy of all hardy garden flowers during middle and late summer. The improved varieties we offer give a wide choice in color combinations of white, pink, lavender and red.

Planting. It is advisable to plant Phlox in the autumn—September 15th to October 15th being a good period. Set the plants 15 to 18 inches apart and the roots about 2 inches below the ground surface.

Our large descriptive catalogue, "Creating your Landscape," sent on request.

	Each	Doz.		Each	Doz
Baron Van Dedem. Scarlet-blood red.....	\$.035	\$3.50	Jeanne d' Arc. Pure white; late; tall....	.30	3.00

Phlox Subulata, Rosea (pink).....	.25	2.50
Phlox Subulata, Alba (white).....	.25	2.50

A border of Hardy Irises for spring bloom is rarely excelled in beauty

IRIS (Fleur-de-Lis)

One of the hardiest and most beautiful flowers either for cutting or garden display. Does well in most any reasonably good soil and location. When planting (early fall is the ideal season) plant merely deep enough to properly cover the roots. Avoid fresh manures as a fertilizer. Once established the Iris is practically permanent. Our complete catalog "Creating Your Landscape" sent on request.
